DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 8 October 2004 was filed after the mailing date of the Non-Final Office Action on 5 October 2004. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the Examiner.

Allowable Subject Matter

2. **Claims 1 – 11, 20 – 24, and 26 – 30** (now renumbered 1 – 21, respectively) are allowed.

3. For **Claims 1 and 20**, as discussed in the Interview Summary (16 November 2004), the amendments to those claims overcome the closest prior art (Lambert; US Patent No. 6 750 904 B1). More specifically, Lambert does not teach or fairly suggest a method for creating a preselected lenticular image using a charged coupled device comprising the steps of: creating a first digital image on a plurality of first charged coupled device sensor columns in the charged coupled device at a first position, moving the charged couple device to a second position after creating the first digital image, creating a second digital image on a plurality of second charged coupled sensor columns in the charged coupled device at a second position after moving the charged coupled device to the second position; and storing said first and second digital images in an alternating interleaved fashion forming an interleaved image.
